ASX Code: MLM

ASX RELEASE

28 NOVEMBER 2018

GREEN COAST RESOURCES OPERATIONS UPDATE

Metallica Minerals Limited ([ASX:MLM](#)) ("Metallica", or "the Company") is pleased to provide an update on the bauxite barging and transshipping operations of Green Coast Resources Pty Ltd (GCR) at Hey Point in far north Queensland.

It is planned that GCR will be responsible for barging and transshipping product from Metallica's Urquhart Bauxite project through Hey Point once the project begins production. Metallica's Managing Director Simon Slesarewich recently visited the GCR facilities following the recent announcement regarding the granting of access to build a haul road connecting Urquhart with Hey Point.

Metallica Managing Director, Mr Simon Slesarewich said:

"The Company is pleased to report that GCR continues to make good progress in ramping up towards planned daily loading rates with no major incidents having been reported since recommencing operations earlier this year. We will continue to monitor GCR's progress and look forward to continuing our strong working relationship and finalising the logistics contract so as to facilitate production from the Urquhart Bauxite project."
